

Buenos Aires, August 2015

Dear Sir or Madam,

AMC Logistics - www.amc-logistics.com - has the pleasure to represent exclusively the most complete maritime data system in South America, Datamar - www.datamar.com.br

Our objective is to pinpoint the variety of this system aiming at marketing strategies to help to explore new markets for your company.

In our more than 40 years' experience in the international logistics and transport the tool has been proven as a very valid and daily source of information during the last decade.

The system has been developed jointly with the maritime community some 10 years ago with the objective to give the maritime shipping lines, the logistics providers, exporters and Importers a fast and flexible tool to allow:

- ✓ To identify new customers
- ✓ To analyse the performance in relation to competition in the respective commodity/market
- ✓ To improve the operational planning
- ✓ To receive precise information about the maritime carriers

The system is constantly not only updated but also up-graded based on the need of the users.

Below please find some of the information the data bank offers:

- ✓ Exporters and importers local and foreign
- ✓ Vessel's name
- ✓ Date of vessel's call
- ✓ Local and foreign load port
- ✓ Local and foreign discharge ports
- ✓ Country of origin / final destination
- ✓ Point of origin/ final destination
- ✓ Trade line
- ✓ Maritime Carrier
- ✓ Description and selection of the cargo as per harmonized customs code
- ✓ Description of the cargo as per Bill of lading input
- ✓ Number of containers in TEUS, 20'and 40'
- ✓ Weight in kilos
- ✓ Type of cargo – container, break bulk, in bulk: liquid or grain)
- ✓ Equipment type, dry, reefer or tank container

Yours faithfully,

Andreas Meyer
